

Telit Communications PLC
(the "Company" or "Telit")

Trading Update

Rome, Italy 31 January 2008: Telit Communications PLC, a global leader in machine-to-machine (m2m) communications, advises that its results for H2 2007 and for the full year are expected to be in line with market expectations. Trading in 2007 has been strong, with an increase of more than 70% in revenue. This is in line with the Company's compounded annual growth rate of 72% during 2003-2006. This growth was achieved while margins continued to improve. Telit achieved for the first time a positive EBIT in H2 2007, as well as a positive EBITDA for the full year. Trading in the current financial year is also in line with market expectations.

Mr Oozi Cats, Chief Executive of Telit Communications stated:

"During 2007 the Company continued the expansion of its global footprint. Inaugurated in mid-2006, Telit Americas began making headway in the American market and has secured more than 80 design wins with new customers and, as previously announced, an order worth \$10 million over a period of two years. Also last year, Telit Asia Pacific opened sales offices in China (Shenzhen and Shanghai) and in Taiwan (Taipei) and secured more than 70 design wins in the region."

"2008 marks the beginning of an extremely exciting time for Telit. We achieved our goal of a break-even position at the operating level by the end of 2007, and are committed to continue providing the highest quality products to our customers and return-on-investment to our investors. The success of our American and Asia Pacific operations as well as the continued strong trading in Europe highlights Telit's commitment to bringing our outstanding product base and expertise to the global market. I look forward to presenting the preliminary results in February, and view prospects for 2008 with great confidence."

Telit will report its results for the year ended 31 December 2007 on 26 February 2008.

About Telit

Telit is a leading global wireless technology company. It develops, manufactures and markets GSM/GPRS, UMTS/HSDPA and CDMA/EVDO enterprise communication modules for machine-to-machine (m2m) applications which streamline business processes by enabling machines, devices and vehicles to communicate via mobile networks. Telit's products are sold and deployed worldwide through offices in China, Denmark, France, Germany, Great Britain, Israel, Italy, Korea, Spain, Taiwan, and the USA. Telit Communications PLC is listed on the AIM (Ticker: TCM). For more information about the company, please visit www.telit.com.
