Telit Receives €6.5 Million Grant Payment

Telit Communications PLC is pleased to announce that it has received the first instalment, in the amount of €6.5 million, from the previously announced grant from the Italian ministry of Economic Development. The award, which was obtained in 2006, is split into a €2.6 million grant and a €3.9 million loan at favorable terms, secured by the Italian government with a repayment schedule spanning 10 years. The entire updated amount of the award is approximately €13 million and the next instalment is expected at the end of 2009.

The award was granted in connection with Telit's R&D facility in Sardinina which, since its incorporation in 2006, has greatly strengthened Telit's R&D capabilities and has already contributed to Telit's product portfolio with the addition of the UMTS, WiFi and integrated applications. The Sardinia facility, currently employing 36 R&D personnel and expected to reach 40 employees by year end, specialises in short range RF technologies such as Bluetooth, Zigbee and WiFi, as well as the convergence of long and short range technologies. This R&D centre also leads, among other projects, Telit's involvement in the E-Call initiative and the Gas AMR project mandated by the Italian authorities.
