

Telit Communications PLC

Half year trading update

London, 11 July 2018 – Telit Communications PLC (“Telit”, “the Group”, AIM: TCM), a global enabler of the Internet of Things (IoT), has published a trading update for the six months to 30 June 2018.

Group revenue is expected to be in the order of \$201 million (H1 2017: \$177.6 million), an increase of 13.2% year-on-year, with a revenue contribution from Telit’s connectivity and IoT platforms services in the order of \$16.5 million, up 16.2% (H1 2017: \$14.2 million).

Gross profit margins have stabilised following the declines seen in 2017.

As at 30 June 2018, Group net debt had decreased by \$5.2 million to \$25 million (31 December 2017: \$30.2 million).

The Group plans to publish its interim results during the first half of September 2018.

Yosi Fait, Chief Executive, commented:

***“We look forward to reporting a strong performance in the first half of the financial year, in line with our expectations. Revenue growth was driven by the increase in delivering of LTE products, mainly in the North American market, ramp up of new designs and strong demand for our connectivity capabilities.*”**

***“Our cost optimisation plan, initiated during the last quarter of 2017, is on track and we are already seeing some of the operational and financial benefits.*”**

“Our gross margins have now stabilised and together with the revenue growth and costs rationalisation, we are making headway towards a return to being a sustainably cash generative business.”
