

Industry's Most Trusted Platform for Secure Remote Access to Semiconductor Equipment

Telit secureWISE®

secureWISE serviceNET Hubs

- Configurable end-to-end remote connectivity across global private networks to equipment.
- Being unreachable via the internet, the fab is completely protected from unwanted internet-facing attacks.
- Machine owners and builders remotely collaborate to:
 - Improve equipment performance
 - Reduce operational costs
 - Protect intellectual property throughout the life cycle

Telit secureWISE®

Semiconductor FAB

Toolmaker OEM

Centralized access and control for all suppliers and OEMs

Tool Availability

Improved uptime, reduced downtime

Single secure connection to and from serviceNET through connection in the cloud

Secured Data/IP

New revenues from differentiated products and value-added services

More granular control over data

Reduce Costs

Reduced travel time and service costs

Full audit trail of connections and data

Improve Installation

R&D closer to customer and rapid equipment installation support

High Global Industry Penetration Today

secureWISE Global Footprint
