Motivation

During the development, deployment and ramp-up phases of your project, you can be sure of our professional support – one of the most valuable and outstanding qualities of working with Telit Cinterion.

The goal of our support is to increase product reliability, reduce the time to market and save you money. Based on our long-term experience we have developed the most suitable support packages and workshops for each project phase.

Package Description

By performing the audio measurements on the device our experts will verify the quality of the audio interface. As the result of the audio measurements and adjustments our engineers will provide the appropriate and optimized settings for the built-in module.

Package Offer

Package Content

▎ General evaluation of audio quality
