Telit Cinterion

deviceWISE® Smart Energy Monitoring
## Enter a New Era of Energy Monitoring and Management

Transform Energy Management for Industrial Excellence

The deviceWISE Smart Energy Monitoring app is a deviceWISE SMART START app implementation. It is available as an application add-on for deviceWISE VIEW, powered by Telit Cinterion.

This app is a comprehensive solution for your industrial operations and empowers you to:

- Track power consumption
- Enhance efficiency
- Ensure energy quality

deviceWISE Smart Energy Monitoring empowers your business with real-time insights and actionable data. These insights drive smarter decisions and boost your bottom line.

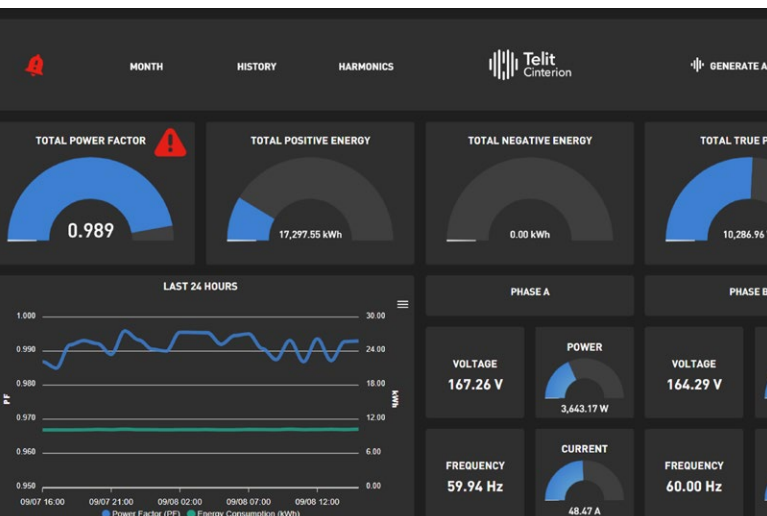

Key Features and Benefits

Reduce Your Energy Cost
As much as **30% of the energy produced in the U.S. is wasted** due to technical inefficiencies. Take control and reduce your energy costs by proactively monitoring:

- Energy inputs
- Power factor
- Reactive energy
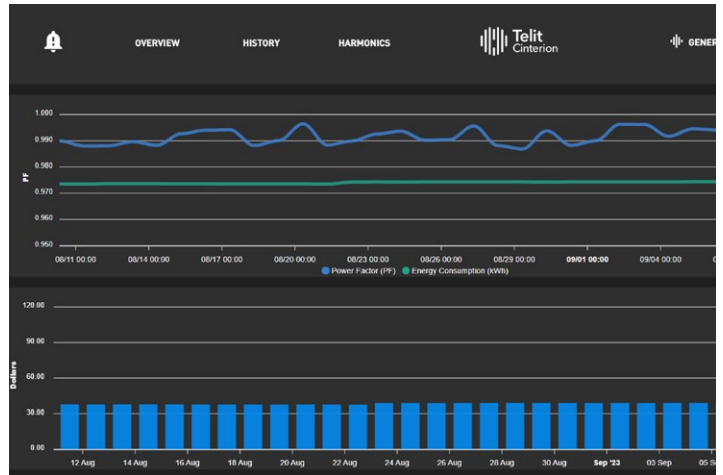

Universal Compatibility
Collect data from energy meters effortlessly. Our app seamlessly integrates with a range of metering devices. This capability ensures full visibility into your energy usage, regardless of your current infrastructure.

Advanced Analytics

Gain a deeper understanding of your energy profile to optimize your operations. The app's out-of-the-box analysis capabilities include monitoring vital metrics, such as:
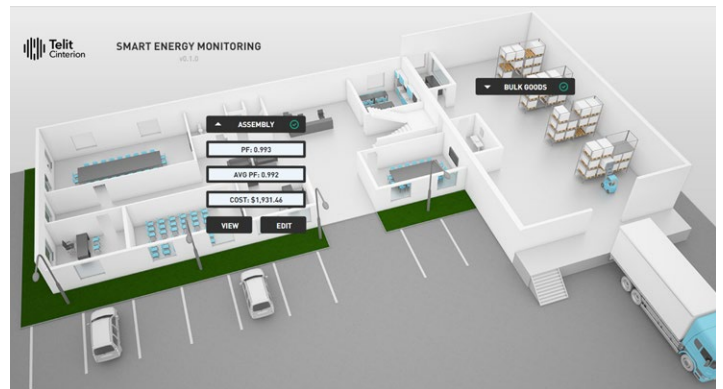

- Energy cost
- Power factor
- Energy quality
- True power
- Harmonics
- Reactive energy

Real-Time Alerts

Stay ahead of energy issues with real-time alerts. They notify you to take immediate corrective action when user-defined thresholds are exceeded, as well as the following:

- Anomalies
- Irregularities
- Sudden energy consumption spikes

Cost Allocation

Efficiently allocate energy costs between departments and even assign energy costs to specific products. Achieve better cost control and transparency within your organization.
