Family Concept

Longevity and cost efficiency are built right into the developer's product architecture with the Telit Cinterion family, "design once, use anywhere" philosophy.

Designers looking to add LTE capabilities to commercial and industrial computing devices benefit from the simple, yet powerful mPCIe form factor with the flexibility to choose another technology best suited for the application environment from any one of the other models in the xE910 mPCIe series.

IoT Connectivity Ready

This product is capable of supporting the extensive suite of Value Added Services from IoT Connectivity including Module Management and others which make the management of IoT deployments under mobile networks effective, enhancing profitability and reliability. It is also Portal-ready which means that the AT command library in this module includes a set of high-level commands designed exclusively for quick and hassle-free on-boarding of the device to the portal and to back-end systems and servers. Telit Cinterion Portal-ready modules powered by deviceWISE make application-level data flows and controls simple to program, maintain and improve.
